

e-Tips for Families

Creating a Positive Learning Environment

A desk in a quiet room is ideal. If you are tight on space, think creatively about any underused areas in your home: a hallway, closet, or corner may be the perfect space.

A few tips for success:

1. Let your child design their workspace.
2. Make sure the space is well lit and free from distractions.
3. Use headphones to prevent outside noise, especially if sharing a space.
4. Have reliable power and internet connectivity.
5. Keep doors open, and practice good digital safety.
